

Research into Community Cohesion within Northamptonshire County

As part of a joint project for the development and implementation of community cohesion within Northamptonshire, a series of research methodologies are being put into practice to collect relevant information. The information that is received will be collated to identify good practice models and examples of successful community cohesion to develop and implement throughout the wider community.

With this, relevant projects and organisations are asked to assist in this research by completing the following questionnaire and return it either by email or post at your earliest convenience, before 31st January. All the information will be gratefully received and will be confidential for the purposes of the project.
